Why replacement batteries?

COST REDUCTION

Every year, many devices are needlessly thrown away. BatteryUpgrade batteries prolong the life span of your devices for several years. This means lower depreciation costs for you.

PRODUCTIVITY

Poorly performing batteries cause frustration for your employees. Replacement batteries take away these frustrations and therefore contribute to a higher productivity.

INCREASED MOBILITY

If your employees work on the move on a regular basis, a battery with extended capacity can double the available mobile work time.

ENVIRONMENT

You contribute to a better environment by replacing a device later. A new battery gives your device a new lease of life and at the same time you help to reduce the amount of waste.

Why batteryupgrade.com?

QUALITY

We only supply high quality batteries. Our products meet all requirements and guidelines regarding quality and environment: ISO9001, UL, CE, RoHS.

SERVICE

We supply high and personal service both before and after delivery. Your order can be delivered within 1 to 2 weeks

PRICE

Our prices are on average 20% lower than the market average. For business orders from 25 pieces are special rates and discounts available.
